UFO UPDATE

with Michael and Aurora El-Legion

This month's column is dedicated to answering the allegations made by Mr. Ed DeMar in the letters to the editor section of this month's Omega. Just as this column was being prepared, we learned of Mr. DeMar's letter. We wish to devote this month's column to address the issues, as Mr. DeMar sees them, and to hopefully clear up any erroneous concepts or opinions that may be battered about.

As it was so close to presstime when this column was prepared, research report in depth on the above matter will be left to future columns. But rest assured, Omega readers will be kept abreast of the latest developments and discoveries.

We checked out Mr. DeMar's story with two reliable sources to obtain the "other side of the story". The two we chose were both very knowledgeable about Bill Cooper. Once source is his neighbor, friend and business associate, Stan Barrington of Sedona, the other source was a personal friend of ours, Charles Wren, who also films and markets Cooper's tapes. Charles turned us on to Stan and Stan was able to help us fill in many of the blanks.

We will attempt to answer many of the points of DeMar's letter. Let us first address the "German Conference". Cooper was guaranteed he would not be canceled but he was, after being sent $3000 for two first class tickets to the UFO conference in Germany. Cooper hired Michael Tallen as his agent in May 1990. Tallen borrowed $1400 from Bill to produce his video tapes of his lecture. We were told he lied to Bill about the cost of reproducing the videos, pretending the video cost much more to produce than he was actually spending and instead had Doug Dean of Cottonwood rip off Bill's master copy and then sold them illegally, under the banner "Need to Know Productions".

Cooper was told the videos were going to be made in Hollywood when in reality Dean was dubbing them at home on his VCR. Cooper went to Dean's home one Saturday last fall to retrieve his master tapes. Cooper found Tallen not at home, but had a pleasant conversation with his gardener and then departed.

We have been informed that Dean came home and found that Cooper had been there and immediately panicked, out of guilt, afraid Cooper would return. He slashed his own tires and went to the police and had a restraining order issued by the court to keep Cooper away. Cooper has never been questioned about the incident or charged by the police in this incident.

We were told that Tallen also lied to Cooper about Bruce Reed, the man who first introduced Tallen and Cooper. Tallen then had Reed as a partner and slickly talked Cooper into a 20% agent's contract to cover every penny Cooper would earn, making glib promises to Cooper. He then told Cooper that Reed would have to be cut out because he was a drug dealer. Cooper believed Tallen's act, only later to find out he'd been lied to by Tallen as well as losing over $4000 and the master tapes as well.

Next, let us set the record straight on Cooper's title while employed by the Navy. Cooper was Petty Officer of the Watch in the command center for the Commander-in-Chief of the Pacific Fleet Staff - CINCPACFLT - OPSTAT - reporting and Naval Intelligence Briefing Team, and was Petty Officer of the Watch in the Command Center, and received an honorable discharge in December 1975, Rank E-6.

Since leaving the Navy, Cooper has worked at several companies engaged in work for the government or the intelligence community. Some of this work involved training foreign military personnel. However, he is not now connected with the government or the intelligence community except for friends he has made over the years.

John Lear, in December 1988, invited Cooper to see *Dallas Revisited*. Cooper was keenly interested in the tape, having seen information on the Kennedy assassination in documents dating back from the 1970 to 1973 era. This was while Cooper was stationed in CINCPACFLT headquarters and his job was to brief Admiral Cleary on any UFO or military activities in the Pacific.

Cooper went to Lear's home in Las Vegas and Bo Gritz was also privy to the film. Lars Hansson, the original person to supposedly give both Lear and Gritz the tape. Hansson now denies having anything to do with the Kennedy tape. We have been told he is lying and that the proof is that it is his voice that is narrating the video tape. One can clearly see in the Japanese computer color- enhanced version that William Greer, the secret service agent in the front seat turns with a .45 in his hand and shoots Kennedy. Cooper also had learned before seeing the film that Greer had

not now connected with the government ... except for friends he has made over the years.

John Lear, in December 1988, invited Cooper to see *Dallas Revisited*. Cooper was keenly interested in the tape, having seen information on the Kennedy assassination in documents dating back from the 1970 to 1973 era. This was while Cooper was stationed in CINCPACFLT headquarters and his job was to brief Admiral Cleary on any UFO or military activities in the Pacific.

Cooper went to Lear's home in Las Vegas and Bo Gritz was also privy to the film. Lars Hansson, the original person to supposedly give both Lear and Gritz the tape. Hansson now denies having anything to do with the Kennedy tape. We have been told he is lying and that the proof is that it is his voice that is narrating the video tape. One can clearly see in the Japanese computer color- enhanced version that William Greer, the secret service agent in the front seat turns with a .45 in his hand and shoots Kennedy. Cooper also had learned before seeing the film that Greer had done it.

Those who are in the know feel that John Lear, Bo Gritz and Lars Hansson may very well be involved in disinformation. Cooper was given false information that was very cleverly mixed with true information in an attempt to destroy Cooper's excellent credibility. Lear, Gritz and Hansson seem to work together, confusing and destroying the credibility of Cooper in a very slick fashion, first befriending him, then withdrawing their support afterwards.

This was really of no surprise to Cooper. He discovered that Lear was flying missions for the CIA, flying agents into Groom Lake often. Groom Lake, as many of our readers know, is also called Area 51 in Nevada and is where our government and the "Greys" interact with one another, is in Dulce Base, New Mexico, in top secret. Bob Lazar, who worked at Groom Lake, broke silence on the Groom Lake installation, and we have copies of Lazar's comments on video of the outrageous and bizarre secret relationship of our government and the "Greys". We have yet to see if Lazar is for real, or if he is part of the disinformation network, but we will have more on Lazar shortly.

Mr. DeMar says check Don Ecker of UFO magazine fame. We are told by Stan Barrington that Cooper checked out Ecker and found numerous warrants for his arrest in Boise, Idaho. He claims to have worked for the Boise Police Department, but in actuality he never did. He did work as a narcotics officer in Boise, but was fired after one and a half months after reportedly getting drunk and threatening people that he would "bust" them. His next job was as a prison guard where he blew off his leg with his gun and was fired. He is known as an alcoholic.

Jim Spieser, Stanton Friedman and William Moore have been identified by many as people who destroy the credibility of honest people and who have confused UFO researchers with disinformation.

We have also experienced their attempts to confuse us and to injure our reputations by impugning our honesty and integrity.

You can write to us c/o Omega New Age Directory and, for $5, we will send you more information, including a 27-page report, about William Cooper.

Until next month - Keep your eyes on the skies!

The El-Legions welcome your questions and comments. Write to: UFO Update, c/o Omega New Age Directory, 6418 S. 39th Avenue, Phoenix AZ 85041.
